With this form, you can identify health areas where you're doing well and where you may need to make lifestyle changes to improve your overall health. The larger the gap between what the ideal is and where you scored should help you identify which areas of the Wellness Pyramid to prioritize.

Lots of food sources provide vitamins and minerals, but American adults are generally falling short in meeting their daily nutrient requirements. If certain nutrients are missing, your body isn't receiving the resources it needs to function properly. Your overall health can be negatively impacted. Consider focusing on the foundations of wellness, Movement & Metabolism and Nutrition & Digestion, as you pick your top 3 health priorities.

**Identify which health goals you'd like to focus on in each category of the Wellness Pyramid:**
